

# Schormeiker Lugo

UI/UX Designer

Caracas, Venezuela | schormeikerl@gmail.com | Spanish: Native - English: basic / technical

UI/UX Designer and Frontend Developer with over 7 years of experience transforming complex user flows into efficient, user-centered interfaces. My profile bridges the gap between creative vision and technical execution, leveraging a solid foundation in HTML, CSS, and JavaScript to build interactive experiences using React and Vite, supported by agile backend infrastructures in Supabase.

I specialize in the strategic integration of Artificial Intelligence within design and development workflows. With advanced training in Prompt Engineering, I maximize the potential of large language models—ranging from commercial solutions to locally hosted LLMs—to optimize workflows, accelerate visual ideation, and automate creative processes.

## Skills

- Figma
- Wireframing
- Prototyping
- HTML & CSS
- Javascript
- Wordpress
- Photoshop
- Illustrator

## Professional experience

<b>Aqomi · (Polonia)</b> Sep 2023 - May 2025	I developed complete visual identities for emerging brands, applying consistent design principles across digital and physical environments. I designed and prototyped web interfaces in Figma for corporate websites and conversion-oriented landing pages. I used AI tools such as ChatGPT to generate supporting content (naming, initial copy, structure) and Midjourney for conceptual visual explorations in the early stages of branding. I implemented custom WordPress sites, optimized for performance and mobile experience, allowing clients to manage their content autonomously.
<b>Sacscloud.com · (México)</b> Ago 2020 - Ago 2023	I redesigned the admin dashboard for a SaaS platform, reducing user navigation time by 30%. I implemented interactive prototypes with Figma to validate ideas with stakeholders before the development phase. I established reusable design systems that improved visual consistency and reduced delivery times.
<b>Splinterlands · Temporary contract (USA)</b> Nov 2021 - Mar 2022	I designed user interfaces for new in-game features, improving daily player retention. I integrated Midjourney-generated visuals to enrich the game's visual universe, providing a unique conceptual approach. I collaborated with developers and the blockchain team to align the design with token and NFT dynamics.
<b>TakoDeFi · (España)</b> Ago 2020 - Abr 2021	I designed the user interface for a DeFi platform focused on staking and token farming, emphasizing visual clarity and user trust. I crafted intuitive user flows tailored for individuals with no prior crypto experience, significantly reducing transaction errors and abandonment rates. I worked closely with Web3 developers and smart contract auditors to deliver a transparent and easy-to-understand experience, aligning the design with the decentralized ethos.
<b>Koomoo · Freelancer (Colombia)</b> Jul 2020 - Sep 2020	I redesigned dashboard modules and user flows for an eCommerce management platform, improving navigation efficiency for retailers. I conducted UX audits and proposed solutions based on heuristic analysis that increased the adoption rate of new features. I collaborated with product managers and front-end developers to build a design system adaptable to different user levels.
<b>Limbic · Freelancer · (Chile)</b> Ene 2018 - May 2020	I conceptualized and designed institutional and e-commerce websites for technology startups. I provided accessible and responsive solutions that improved conversion rates by an average of 20%.
<b>Password Technology · (Venezuela)</b> Ago 2016 - Abr 2017	I collaborated with technical support teams to improve the customer experience for digital services. I initiated a visual transition toward a more modern design, improving the corporate image.
